SUMMARY

Strategic data analyst and storyteller skilled at transforming complex data into actionable insights using SQL, Python, and BI tools. Partner cross-functionally to translate business needs into AI-driven analytical solutions and practical business recommendations.

EDUCATION

Columbia University <u>M.S. in Applied Analytics</u> GPA: 3.8 • Relevant Courses: SQL, Python for Data Analysis, Storytelling with Data, Business Analytics, Foundations of Data Engineering	New York, NY <u>Jan 2025 – May 2026</u>
York University <u>M.S. in Marketing</u> GPA: 3.4 • Relevant Courses: Marketing Metrics, Marketing Analytics, Market Research, Consumer Insights, Digital Marketing Strategy	Toronto, ON <u>Sep 2022 – Aug 2023</u>
Rutgers University <u>B.S. in Marketing</u> GPA: 3.7	New Brunswick, NJ <u>Sep 2017 – May 2021</u>

PROFESSIONAL EXPERIENCE

Columbia University, School of Professional Studies <u>Admission Data Analyst Intern</u> • Managed end-to-end recruitment research projects , combining market research and internal data to drive recommendations. • Identified data inconsistencies across 3,000+ applicant survey records; leveraged Python and LLMs (ChatGPT) to build rule-based data-cleaning workflows and validate AI outputs, achieving 85% normalization for reliable feeder-school analysis. • Built Excel reports on recruitment trends, enabling stakeholders to prioritize high-potential schools and outreach opportunities.	New York, NY <u>Sep 2025 – May 2026</u>
Questrade Financial Group <u>Bilingual Customer Service Specialist</u> • Delivered multi-channel client support and resolved 20+ escalations using strong problem-solving and communication skills. • Partnered cross-functionally with management to analyze key KPIs (resolution time, escalation rate, CSAT) by transforming Salesforce data using SQL (Joins, CTEs, Window Functions), uncovering actionable insights to drive process improvement. • Maintained a Power BI dashboard for performance tracking, driving targeted coaching and a 10% CSAT increase in 3 months.	Toronto, ON <u>Nov 2023 – Nov 2024</u>
IQVIA <u>Primary Intelligence Intern - Market Intelligence & Analytics</u> • Interviewed healthcare professionals to gain qualitative insights on prescription trends, competitive dynamics, and patient pain points; supported survey design by translating qualitative insights into structured questionnaires and validated survey logic. • Used advanced Excel functions (e.g., VLOOKUP) to standardize open-ended survey responses, ensuring high-quality data . • Analyzed segment-level performance using pivot tables and SUMIFS to identify key drivers of pricing and patient preference. • Designed PowerPoint dashboards with ranked tables and trend charts, informing pricing strategy and competitive positioning .	Shanghai, China <u>Mar 2022 – Jun 2022</u>

PROJECT EXPERIENCE

Patient Demand Forecasting Capstone Project - Tend Dental • Led discussions with stakeholders to clarify business objectives, interpret datasets, and align key performance indicators. • Conducted EDA on 3M+ patient records using Python (Pandas, NumPy) and built Power BI dashboards with DAX measures and calculated columns to surface retention and operational trends, informing predictive features and capacity planning. • Developed a machine learning forecasting model to predict patient volume, achieving strong accuracy with a MAPE below 15%. • Leveraged Claude to develop an AI-assisted Streamlit workflow for data uploads, automated forecasting, and operational planning.	<u>Sep 2025 – Dec 2025</u>
Travel Logistics Database & Optimization Tool - Columbia University • Designed a 3NF travel data model in Excel and built an R-based ETL workflow to import normalized CSV tables and create and populate the PostgreSQL schema; validated data quality by reconciling SQL query outputs against Excel source records. • Developed an interactive Shiny app in R that integrated SQL outputs to visualize road trips with dynamic maps and routes, estimated to cut planning time by 70% compared to manual searches, enabling travelers to quickly design personalized itineraries.	<u>May 2025 – Aug 2025</u>
Consumer Analytics Dashboard - Columbia University • Cleaned consumer perception data and applied correlation and regression analysis in R to identify key drivers of product ratings. • Designed a multi-tab interactive Tableau dashboard (clustered bar charts, annotations, and filters), enabling stakeholders to navigate between product format analysis and customer satisfaction and supporting strategic decision-making.	<u>Jan 2025 – May 2025</u>

SKILLS

- Data Analytics: Exploratory Data Analysis (EDA), Data Cleaning, Data Modeling, Data Validation, Data Manipulation, Statistical Analysis, Trend Analysis, KPI Analysis, Data Visualization, Dashboard Reporting, AI-Assisted Analytics and Automation.
- Data Tools: SQL, Python, R, Excel, Power BI, Tableau, DAX, Pandas, NumPy, Salesforce CRM, Large Language Models, AI.
- Business Skills: Cross-Functional Collaboration, Stakeholder Communication, Requirements Gathering, Business Intelligence.
